DETAILED ACTION

Allowable Subject Matter

1. Claims 12-21 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reason for the indication of the allowability of claims 12-21 is:

Regarding claims 12-21 is the inclusion therein in combination as currently claimed of the limitation of a fabrication method for a Field Emission Display (FED) cathode plate with an internal via, comprising the steps of sequentially forming a dielectric layer and a gate line on the resistive layer and the tape line; etching the gate line and the dielectric layer to form a cathode plate with a cavity of microtip, a hole upon the cavity of microtip, an internal via, and a contact.

This limitation is found in claims 12-21, and is neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments, see Amendment After Final, filed January 20, 2004, with respect to claim 12 have been fully considered and are persuasive. The rejection of claims 12-21 has been withdrawn.

Art Unit: 2831

In response to the applicant's argument the Examiner agrees that neither Kishino et al (US 6,133,678) nor the cited prior art discloses, teaches or suggest a fabrication method for a Field Emission Display (FED) cathode plate with an internal via, comprising the steps of sequentially forming a dielectric layer and a gate line on the resistive layer and the tape line and etching the gate line and the dielectric layer to form a cathode plate with a cavity of microtip, a hole upon the cavity of microtip, an internal via, and a contact.
